**5th Prize – Emanuel Navon (Israel)** Here again only 2x2 changes, but what a beautiful long-shot mates they are! There are many attractive effects: pin-unpin dual avoidance, line-opening + line-closing, gate-opening, unblock and a surprising battery mate. With an active role of WRa1 in the set, and the corrective effect of the key (compared to the 1.K-?), this is a most artistic presentation. Judge: **Marjan kvačević**

Theme: At least two changed mates between the phase (solution or try) beginning with white castling (1.0-0 or 1.0-0-0), and any other phase (set-play, try, solution, but not a twin).

The entries with white-to-play form and those with new records would be especially welcome
