Theme of TT-126: In the initial position there is the only solution which satisfies all formal and esthetic requirements.

But black must move!

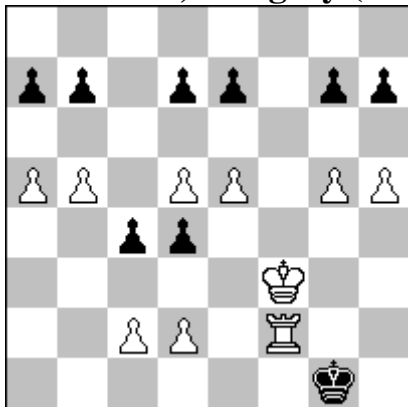

After black move(s) white complete a stipulation!

- 3.d3/c3 d6/e6
- 4.e6/d6 g6/h6
- 5.h6/g6 Kh1
- 6.Rf1#

In the diagram position there are four pawn groups. Black can delay getting checkmated by pawn moves where can use the pawn groups in any order and select a pawn to move within the groups.

That yields 384 full length variations altogether and each pawn is involved in every second variation in the average.
