JTJ. Lorinc – 40, Pat a Mat, 2014

Special HM

h#2 3 solutions **4+13**
Antircirce Cheylan
e7, f6: magic queen

1.mQe7-a7 [a1,g1=w] Rg1-g4 2.Sc1-d3 Ba1-e5#

1.mQe7-c5 [c1,g1=w] Sc1-d3 2.Ba1-e5 Rg1-g4#

1.mQe7-a3 [a1,c1=w] Ba1-e5 2.Rg1-g4 Sc1-d3#

C+ Popeye 4.65 (and newer)

- Mate is delivered by double check of the antircirce battery. Black can parry the double check by 3.mQf6-f5! – recoloring both white pieces, this is accounted by purely motivated B2 – black “guards” their own king to make mQf5 illegal.
- Cyclic change of functions of Ba1, Sc1, Rg1: battery rear, battery front, thematic “selfpin” of mQf6 (+rebirth square vacation of battery front by departure).
- Unique cycle of moves.

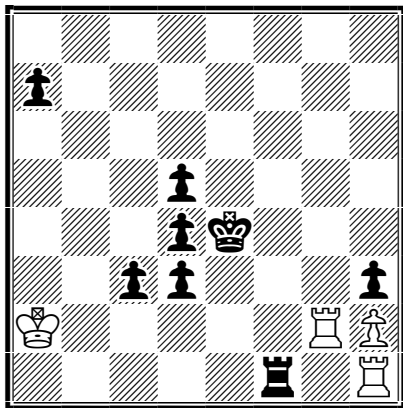

Note: Earlier versions of Popeye and Winchloe may display cooks in this problem, these are software bugs.

4+8

The black rook needs to leave the 1st rank to allow the white king to pass, however, it is white to move and they can't waste time:

1.Rf2! (with Antizielelement: closing the f-file)

1...Re1! (black rook has to find the way around the new obstacle, 1...Rg1? Rb1?)

2.Rhf1! (pure anti-critical move) **2...Re3** **3.Kb1** **Rg3** **4.Kc1** **Rg1** (peri-critical maneuver) **5.Re1+**

5.Rxe1# (passing the initial square f1 and completing the Rundlauf).

The peri-critical maneuver is made around two (!) dynamic obstacles.

C+ Popeye

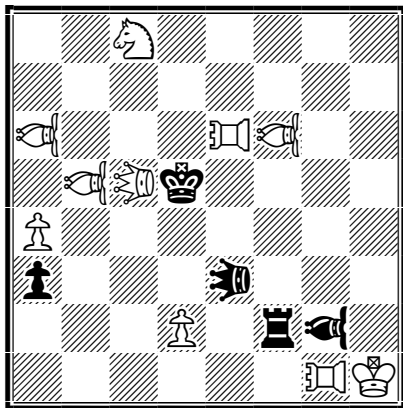

- Antizielelement
- Rehmer (complete form)
- Rundlauf
