A diverse game, where in the first decision is the white pawn's exelcior which turns into a queen and returns to its original field. In the second decision, the black bishop is sacrificed, then the black pawn becomes the bishop phoenix.

Two long auxiliary mats with different paths to mat.

First turn black on knight and then sacrifice the knight to release the white bishop. In the latter case, the black king takes the white bishop and relieves the white king, who then matts the black king with the aid of white pawns.
