Five solutions with promotion to Q and five moves in the same square are surely an remarkable result, but it detracts that the latter are divided between B1 and B2. Also the symmetry does not recommend me to assign a higher place to this problem. (Judge Francesco SIMONI).

It is a pity that all the decisions cannot be organized by the first moves of the black queen. But even so, the plan is rather solid: two victims of the black queen, two of his ambushes for white pawns, a double blocking of the black king by the black bishop and all this is united by the transformation of the pawns in six different fields.

Жаль, что все решения не удаётся организовать первыми ходами чёрного ферзя. Но и так замысел довольно цельный: две жертвы чёрного ферзя, две его засады за белыми пешками, двукратное блокирование чёрным слоном полей у чёрного короля и всё это объединено превращением пешек на шести разных полях.
(Судья А. Феоктистов).

The strategy is simply based on walks of the BK and the WQ, but the combination of BK and WQ crosses should be is a novelty in helpmate and therefore worthy of consideration.
